shrink bags

TRACO

Portable & lightweight, the Econo Shrink Bag System fits anywhere and goes where you need to take it. Only 3" wide and less than 12 lbs.

No assembly required. The Econo Shrink Bag System is ready when you are with regular 110v household current. There is no warm-up or cool-down timer ever! UL safety listed, too.

Light weight HotShot™ heat gun makes it easy to shrink numerous packages without arm fatigue. New safety grip and adjustable heat and air flow improvements.

Choose from 8" or 12" sealer size. Each has a round wire heating element to cut & seal your shrink bag. Flat wires will only seal your shrink bag.

Cut & seal film automatically with adjustable timer. No need to tear your package away. Get a perfect seal every time on your package.
