**Certificate of Compliance - CONEG**  
Council of Northeastern Governors (CONEG)  
Reduction of Toxics in Packaging

Traco Manufacturing, Inc. and its suppliers make a conscientious effort to provide products that are environmentally as safe as possible. Towards this end, Traco Manufacturing and its suppliers do not use raw materials or manufacture products that contain mercury, cadmium, lead, or hexavalent chromium as an integral portion of the product. Also, Traco Manufacturing and its suppliers do not intentionally add any of these materials during the manufacturing process. Traco Manufacturing hereby certifies that all products and related products manufactured and distributed by Traco Manufacturing comply with the requirements of CONEG and the Toxics in Packaging law(s). Specifically:

- 1) We certify that the regulated metals – lead, mercury, cadmium, and hexavalent chromium -- are not intentionally added to any Traco product or product component during the manufacturing process.
- 2) We further certify that the sum of the incidental concentration levels of lead, mercury, cadmium and hexavalent chromium present in any Traco product or product component does not exceed 100 ppm by weight.

Please note that Traco Manufacturing's certification of compliance is based on sample testing and/or information from its suppliers. Traco Manufacturing cannot be held responsible for any faulty or invalid information provided by those suppliers.

Traco Manufacturing maintains a specific analysis of each of the products it manufactures and distributes. If you or your customers require additional evidence that none of these substances are contained in our products, then Traco recommends that you submit samples to an independent laboratory for testing.
